Document cameras, also known as visual presenters, visualisers (in the United Kingdom), digital overheads, or docucams, are real-time image capture devices for displaying an object to a large audience. Like an opaque projector, a document camera is able to magnify and project the images of actual, three-dimensional objects, as well as transparencies.

Film-Tech

When I first got involved with presentation products – back in the mid '80's presentations were the dominant form of business communicating involving groups. Even today, there are millions of individuals getting up each day, in front of a group, and presenting – or lecturing – the audience on some topic or another.

Not Big Enough? Monitors vs Projectors in Conference Rooms
